BUDGET ADDRESS

DELIVERED BY

HON. PETER SMITH

Treasurer of the Province of Ontario

Feb. 22nd, 1923

MR. SPEAKER: In rising to move that you do now leave the chair in order that the House may resolve itself into a Committee of the Whole for consideration of Supply, I wish to present an account of the stewardship of the present Government, not only for the last fiscal year, but previous to that time; in fact, ever since we took office in November, 1919.

Bonus Cheque Not Called For

But before doing this I wish to make a little explanation to the House of a certain matter that affects one honourable member on the Government side. The House will remember well last session, when the matter of the bonus to members was being discussed, that, among others, the honourable member for North Oxford (D. M. Ross) stated that he was opposed to taking the bonus. You will find on page B7 of the Public Accounts, D. M. Ross, \$1,400.00 indemnity, and \$600.00 bonus. Mr. Ross did not receive his bonus, and has stuck by his word in the House at that time, that he was not going to take it. But the Treasury Department and the Audit Office had no means of knowing that he was not going to accept it. Several cheques were left, awaiting members to call for them. Some were only taken shortly before the close of the fiscal year, and that of the honourable member for North Oxford was never taken. But we did not know anything about it until after the close of the fiscal year, so on that account it appears in the Public Accounts this year as though he had received it. As the House is aware, when any cheque is issued from the Treasury Department, as a matter of book-keeping, the cheque is considered as paid, and accordingly goes

into the accounts as such, whether it is cashed or not, so that amount will appear next year in Public Accounts as a refund of \$600.00 from the honourable member. I could have increased my surplus considerably this year if I had only known in time. (Laughter and applause.)

Perplexing Financial Period

I think I can safely say that no preceding Government in the Province of Ontario ever went through such abnormal times as the present Government. The economic conditions were such as to make financing very difficult, and made the carrying on of Government very trying. Nobody, not even individuals, was normal in the matter of expenditures, and on that account it made it very perplexing for the present Government in a great many instances which I shall enumerate as I go along.

The Government had undertaken a great many financial obligations which were not of our origin, but which had to be carried through to completion. We had to meet loans which had been negotiated by the previous administration, with high exchange rates against us in the United States. But I want to say that we have come through very successfully. We have a statement to-day that I am proud to present to this House (applause), and I am sure that no one in this Legislature will contradict me when I say that the adverse conditions with which we have had to contend have never been duplicated under any previous Provincial Treasurer, or any preceding Government.

Now this is the last session of the present Parliament, and I am here to present to the House the financial statement of the Province of Ontario, and—I don't say it in any boastful mood—but I am here to give you the true facts, and am perfectly willing to let the public decide in the next election as to whether they think the present Government has carried on successfully.

Further Improvements to Public Accounts

The Public Accounts have been presented to the members as usual, previous to the bringing down of the Budget. Every dollar of expenditure is included within its pages. There is a possibility of mistakes creeping in on account of the haste with which the Accounts necessarily have to be prepared.

The present administration has endeavoured to simplify them to a great extent, and I believe we have succeeded.

Last year we presented the Accounts of each Department by itself and indexed, which assisted honourable members greatly in finding information. We have instituted a new feature this year which may help members to find items of interest, which is the inclusion at the beginning of each Department of a recapitulation of all the expenditures coming under the control of each Minister, showing the amount of appropriation, the amount expended, and unexpended, or over expended as the case may be. It should be borne in mind that it is a volume of over a thousand pages, and entails a very great amount of work in the Department to get out in such a short time,—the fiscal year commences November 1st. I am convinced that the time is almost ready for the changing of the date of the close of the fiscal year of the Province, in order to give more time to the Department to get these volumes of Public Accounts out, and to give the Department time to verify its work before the Session opens. In the Dominion House the fiscal year closes on the 31st of March, and all the provinces close much earlier than the Province of Ontario. With that same thought in mind, when the late Colonel Matheson was Provincial Treasurer in 1909, and when the Public Accounts were very much smaller, the fiscal year was put back from December 31st to October 31st. With the growth of the Province, and the increase in uncontrollable expenditures, I think the time is almost ripe for making the closing date of the fiscal year still earlier in the calendar year, say the end of May.

Substantial Surplus

I present statements to the House and the members can readily see that the total ordinary receipts for the year ending October 31st, 1922, amounted to \$38,507,311.09. The ordinary expenditure amounts to \$37,442,985.83, showing a surplus of \$1,064,325.26. This very substantial surplus gives me great satisfaction in the knowledge that we have carried on all the various undertakings of Government, paid everything as we went along, and have contributed very largely to the expenditures which have been of great assistance to the rank and file of the people of the Province of Ontario as a whole.

You will also note that we have again this year carried into our ordinary receipts the sum of \$1,218,059.35 from the Lands and Forests Department, which this Government always maintains should be placed in the capital columns, as, to that extent, it was a depletion of our forests. The Government might easily take credit for making provision for reforestation which is being steadily carried on very extensively, and which will ultimately be of great value to the Province of Ontario as a whole in timber resources, and I believe myself that a much more intensive forestry campaign should be carried on. We have throughout the Province thousands of acres of waste land in the older parts of the Province, returning nothing to anybody, which would make ideal places for carrying out reforestation and be of great public benefit, not only from a revenue producing standpoint, but also from the standpoint of affecting the climate.

A Good Record

In the four years the present Government has been in office the expenditures have been mounting up. At the same time revenues have been more than keeping pace with our expenditures. The first year we brought down Public Accounts, for which the previous administration were responsible, they showed a deficit of \$1,559,802. The next year, for which the present Government was responsible, it also showed a deficit of \$802,742.83. The following year we showed a surplus of \$681,789.41, and this year we have the magnificent surplus of \$1,064,325.26—a good record. (Applause.)

Ordinary Receipts

In dealing with the ordinary receipts there have been many increases made in the amounts collected, and the result of legislation introduced by the present Government provided much new revenue. I shall not deal with that in any great detail as the members have the statement before them, but I would like to make special mention of a few which I think will be of particular interest to the members.

Subsidy. The first item is subsidy, \$2,765,729.08, which is \$369,350.20 more than the amount received in 1921, and is based on the new census. It may be of interest for honourable members to know how this subsidy is arrived at. There is a

fixed grant of \$240,000 in consideration of the surrender by the Province of the Customs and Excise to the Dominion of Canada. Then the sum of \$142,414.48 appears as part of the cash subsidy, which has been treated as interest on trust funds held by the Dominion, and the balance is made up of a grant of 80 cents per head of population up to 2,500,000 and 60 cents over that. The population of Ontario in 1901 was 2,182,947; in 1911, 2,523,274; and in 1921, 2,931,264. I am sorry the Government could not take credit for the increase in population. Under the old administration they took credit for the increase in population in the Province of Ontario.

Lands and Forests. The next particular item is that of Lands and Forests, and it is indeed gratifying to tell the House that the revenue from this source in the past year was the largest since Confederation. The magnificent total of \$4,439,340.03 has been collected—over double the amount received from this source in the last year under the previous administration, and of that amount we have charged to ordinary receipts \$3,221,286. This large increase is due to the enlarged and equitable timber dues established by the present Government.

F. W. Hay: Might I ask if the dues have been advanced?

HON. MR. SMITH: Yes.

This accounted for no less an amount than \$460,258.70 in increased dues, and the further sum of \$400,000 was received as a partial result of the Shevlin-Clarke action.

MR. McCREA: Could the Provincial Treasurer tell us how much is in from the Shevlin-Clarke?

HON. MR. SMITH: I haven't got the particulars. Around \$300,000.

MR. McCREA: Will the Provincial Treasurer give us the amount received from all the timber settlements?

HON. MR. SMITH: I will at a future date. I have not got the details with me to-day.

Motor Vehicles. Then a very material increase of revenue was received from motor vehicle licenses, namely \$532,069.77 more than last year. I do not intend to enlarge upon the

increase in the motor vehicle licenses. The Hon. Minister of Public Works and Highways is absent on account of illness, and he will, no doubt, go into that in detail when he delivers his address on the Budget; he is thoroughly conversant with the whole roads policy. I do not intend to-day to go into the detailed expenditure of every department as I am going to leave that to the Ministers themselves. The Treasurer is not supposed to defend the expenditures of the Ministers, but to look after his own department and supply the money for carrying on the different undertakings in the Province of Ontario.

MR. HAY: The Ministers heretofore have never defended the expenditures.

HON. MR. SMITH: They have had nothing to defend.

Succession Duties. The largest revenue producer in the Province for the year was the Succession Duty fees, the amount received being \$6,523,245.21. As I have said before in this House, the Succession Duties is an especial contribution of wealth to the Provincial Receipts, and during the session of 1920 the Government increased the rates of duty very largely, and we were told at that time that they would drive industry out of our country into the Province of Quebec, which had a much lower Succession Duty at that time than Ontario. Since then Quebec has increased her duties on a par almost with the Province of Ontario, so that there is no chance to-day of there being any excuse for industries going to the Province of Quebec to evade our Succession Duties. Ontario is producing more millionaires each year, and the principle of taking a portion of their estates and distributing it in channels from which the less fortunate people may derive benefit is to my mind the proper and sane method. It might also be added that close supervision of the various estates has resulted in increased valuation. Twelve estates alone were increased in value by the officials to the amount of \$973,476.03, which has resulted in increased duty of \$117,759.74.

Estates during the year held Ontario bonds free from Succession Duty to the amount of over \$2,000,000 and the loss in duty in this respect represents the sum of \$419,333.18.

Condemnation of Tax-Exempt Securities

The National City Bank of New York monthly report of January, 1923, is devoted to economic conditions and Government finance. It quotes freely from the Annual Report of the Honourable Andrew Mellon, Secretary to the Treasury of the United States, and I wish to draw especial attention to what he says regarding tax-exempt securities. It is a pity that the preceding administration did not have something of this sort to guide them before they issued \$23,000,000 of succession duty free bonds. In dealing with his recommendation that Congress stop further issues of tax-exempt securities Mr. Mellon says:—

“The most outstanding avenue of escape from the surtax exists in the form of the tax-exempt securities issued by the Federal and State Governments and the political sub-divisions and agencies of the latter. The effect of these exemptions is to provide a perfect avenue of escape from the Federal surtaxes, especially valuable to the wealthiest investors.

“There is nothing clandestine or irregular about the action of the investors, nor are they responsible for the fact that the securities are tax-exempt. The responsibility is with the legislators who not only permit the situation to exist in the case of the government issues, but who go out of their way to create other tax-exempt issues, like the Federal Farm Loan Bonds, for the very purpose of attracting this class of investors. They must know that a five per cent. bond exempt from taxation is much more attractive to an investor who is subject to the high surtaxes than to an investor who is not subject to the surtaxes.”

The old administration commenced issuing these succession duty free bonds in 1906. I will read the House the details of the issues:—

Date of Issue	Maturity	Amount	Rate of Interest
July 1st, 1906.....	One-half due July 1st, 1926, and one-half due July 1st, 1936	\$3,000,000.00.....	$3\frac{1}{2}\%$
May 1st, 1909.....	May 1st, 1947.....	£1,640,547-18-11	4%
June 1st, 1909.....	June 1st, 1939.....	\$3,500,000.00	4%
May 1st, 1911.....	May 1st, 1941.....	\$500,000.00	4%
November 1st, 1911....	November 1st, 1941....	\$3,000,000.00	4%
January 1st, 1914.....	January 1st, 1965....	£817,294-0-0	$4\frac{1}{2}\%$
January 1st, 1917.....	January 1st, 1923....	\$1,000,000.00 (matured)	5%

In round figures they issued \$23,000,000 in bonds free from Succession Duties on which the Province of Ontario has lost in Succession Duties during the last three years approximately \$1,000,000.

I cannot understand why the previous administration issued those Succession Duty Free bonds. They may say that they were sold more easily by this method, but people did not care so much then about Succession Duty Free securities, and these bonds have since become very valuable. We might lose the duty several times on each block because we have no guarantee that when one estate has them and escapes duty payments that they will not be turned over to another estate. As a matter of fact we know where it has taken place several times.

MR. J. A. CURRIE: If those are held in the United States, are they free from that duty?

MR. SMITH: They are not subject to Ontario Succession Duties.

We have retired or re-purchased almost nineteen millions out of the total twenty-three millions.

MR. HAY. Does that reduce our liability or are you holding them?

MR. SMITH: Twelve million are retired, and seven million are held in the name of the Treasurer of Ontario.

MR. NICKLE: At what date did you redeem the 1923 tax-free bonds?

MR. SMITH: The 1st of January, 1923.

MR. NICKLE: When they fell due you simply paid them? You did not redeem them by buying in?

MR. SMITH: They were retired at maturity at par.

MR. NICKLE: Didn't you buy in the 1923 at above par?

MR. SMITH: You will find that in the Public Accounts.

MR. NICKLE: How much of the item of succession duties is cash paid in and how much represented by bonds in lieu of duty?

MR. SMITH: The Public Accounts shows that also in the first statement.

I want to mention in regard to Succession Duties that

although we collected over \$6,500,000, the total cost of collection of that large amount was only \$30,915, for real estate valuations, legal services, salaries and everything combined. I intend to give the House more information on legal fees later on.

Corporation Tax. The next large increase was the revenue from the Corporation Tax, which amounted to \$5,641,357.12, and is some \$2,500,000 more than the previous year, \$2,212,200 representing the five per cent. tax on betting is included in this amount.

Hydro-Electric Interest. Another large increase was Hydro-Electric Interest—\$1,400,000 more than last year. Owing to the unfortunate situation in the Nipigon District the Hydro did not pay us the interest on the development at that place, but, pending judgment, we are including it as an outstanding account, and it appears in the Statement of Assets. The amount is \$290,000.

T. & N. O. Receipts. From the T. & N.O. we received the large sum of \$600,000, or more than \$400,000 over 1921. It might be of interest to know that the T. & N. O. Railway finances are in excellent condition. In 1919 there were overdrafts amounting at times to \$415,000, but during the years 1920, 1921 and 1922, these overdrafts were eliminated, and the Profit and Loss Account put in first-class condition, showing a substantial surplus this year of \$669,000, of which was paid the Province \$600,000.

Ordinary Expenditures

If the members will look at the statements on their desks, they will see the Ordinary Expenditures listed. They will note that the Mothers' Allowances payments are included under "Ordinary."

MR. NICKLE: Where were they last year?

MR. SMITH: "Extraordinary."

MR. MACBRIDE: In view of the amount you are raising from Corporation Taxes, Succession Duties, etc., do you not think you could afford to be more liberal with Mothers' Allowances?

MR. SMITH: I have not the authority. We have been doing pretty well, I think.

MR. MACBRIDE: I give you full credit and commendation for the Mothers' Allowances Act. I only suggested that you be more liberal.

MR. SMITH: The suggestion is worth considering, and will be considered. The Mothers' Allowances, as I have just stated, are included this year in the Ordinary Expenditure, and you will recall the situation last year, when the Prime Minister in giving his address on the Budget Debate admitted that eventually the Mothers' Allowances would have to be paid out of Ordinary Revenue. The only reason he gave the House at that time was that this large expenditure (\$1,379,293) had not been provided for, and was not stabilized, but as soon as we had the Act working on a permanent basis, we would charge it against Ordinary Revenue. The beneficiaries in 1921 were 2,660, last year 3,559, and the expectation is that the number will not increase very materially. The whole Province is now practically covered, and there will not be any very great variation. This expenditure represents a net cost to the Province of \$762,000,—the balance being collected from the municipalities. We received from the counties \$246,000.00, cities \$361,000, and separate towns \$11,000. I wish to commend the municipalities for the promptness with which they have paid up their apportionment. There is still outstanding from the municipalities \$61,000, which we were entitled to at the close of the fiscal year, but owing to the fact that the municipalities were not billed until November 15th, they owe us the last month, as it were.

Ordinary Statutory Expenditure

Now the next item of large expenditure was Statutory, and as I know the House will be interested to know what is contained in Statutory, I will read the items:—

Salaries of Ministers and Auditor.....	\$68,000 00
Criminal Investigations.....	49,668 65
Surrogate and County Judges.....	58,110 52
Ontario Election Act.....	12,149 61
Sheriff's Incomes.....	7,192 06
French, Scholarships.....	6,006 00
Workmen's Compensation Act.....	126,000 00
University of Toronto.....	507,000 00

Ordinary Interest, Payments on Loans.....	11,719,682	70
Refund 2 per cent. on Crown Dues.....	479	97
Lady Whitney Annuity.....	611	11
Teachers' and Inspectors' Superannuation Fund.....	554,158	16
Northern Development.....	581,838	54
Highways Maintenance.....	903,732	20
Assurance Fund, Land Titles Act.....	2,750	00
Common School Fund.....	1,837	94
Seagram Bequest.....	200	00
Teachers' and Inspectors' Superannuation—Audit.....	1,200	00
Probation Officers.....	117	81
Salaries not Voted.....	8,967	77
 Total.....	 \$14,609,703	04

Expenditures Less Than Estimates

The total Estimates voted by the House last session amounted to \$52,454,647.83. The expenditure of these votes was \$44,231,705.65, leaving an unexpended balance of \$8,222,942.18. There were only three departments that exceeded their estimates last year: Education, \$150,464.78, due to the greater number of public schools qualifying for the larger grants; hospitals and charities, \$241,161.19, owing to the larger number of persons in these institutions than was expected; maintenance and repairs exceeded estimates by \$27,000, and refunds, over which we have little control, \$23,000.

Large Capital Expenditures

I have a list of capital and extraordinary expenditures here, and I will read the items to the House:—

EDUCATION.

Assisted Schools.....	\$7,700	00
Consolidated Schools.....	104,542	56
Technical Education.....	552,906	32
Provincial and other Universities.....	1,538,688	00

\$2,203,836 88

HOSPITALS AND CHARITIES.

Sick Children's Hospital, London....	\$20,000	00
National Sanitorium Association....	75,000	00
Rosedale War Memorial Hospital, Matheson.....	1,000	00
Essex Health Association.....	20,000	00
Public Hospital, Sioux Lookout.....	2,000	00

118,000 00

REPAIRS AND MAINTENANCE.

Vault Fittings, Parliament Buildings	17,605	70
Colonization Roads, Capital Ex- penditure.....	402,710	69

LANDS AND FORESTS.			
Capital Account.....	\$711,330	72	
Shevlin-Clarke Investigation.....	28,690	50	
Russell Timber Commission.....	4,636	38	
			<u>\$744,657 60</u>
MINES DEPARTMENT.			
Peat Fuel Investigation.....	\$35,236	39	
Temiskaming Testing Laboratory.....	25,363	50	
			<u>60,599 89</u>
GAME AND FISHERIES.			
Buildings.....			38,048 35
PROVINCIAL SECRETARY, MISCELLANEOUS.			
Unemployment Relief.....			102,523 08
TREASURY DEPARTMENT, MISCELLANEOUS.			
Soldiers' Aid Commission.....	\$112,000	00	
Purchase of Films.....	102,748	19	
			<u>214,748 19</u>
LABOUR AND HEALTH.			
Unemployment Relief.....			233,235 89
PUBLIC WORKS.			
Capital Account.....			588,942 16
PUBLIC BUILDINGS.			
Capital Account.....			1,508,080 20
STATUTORY CAPITAL EXPENDITURE.			
Annuities and Railway Aid.....	\$241,002	71	
University of Toronto Certificates...	30,000	00	
Agricultural Finance Act—Savings			
Offices.....	85,458	09	
Drainage Debentures Purchase.....	319,260	18	
Municipal Sinking Funds paid off....	557	78	
Sinking Funds on English Loans....	37,747	53	
Sinking Funds on Canadian Loans...	5,609,860	94

Total Capital and Extraordinary Expenditure..	\$51,885,480	32	

Heavy Obligations Left by Old Regime

I would like to take a little time to tell you some of the legacies left by the old Government. We have been accused all over the Province of extravagance and that our expenditures have been mounting up, but I wish to give you a few

samples of what we had to contend with when we came into power. In 1917 the previous administration passed an Act, known as The Teachers' and Inspectors' Superannuation Act, which gave a retiring allowance to teachers and provided for the creation of a fund known as The Teachers' and Inspectors' Superannuation Fund, the teachers and inspectors and the Government contributing the same amount. The fund was in the custody of the Provincial Treasurer.

Now, Mr. Speaker, notwithstanding that they passed the Act themselves, and had been in power three years after passing the law, when we came in we found nothing had been done except that the payments had been received from the Teachers and Inspectors and had gone into the Consolidated Revenue Fund. They had kept an account of it, and it had appeared in the Public Accounts, but no actual contribution by the Government had been made. Shortly after we came into office this superannuation system was taken up and we put it on a good solid basis, according to the Act. In the first year (1920) we paid in round numbers \$1,000,000. We cleaned up the whole situation as far as the old Government was concerned, making a total payment in that year of \$1,084,364; in 1921, \$439,224.01, with interest of \$28,329.95, making \$467,553.96; and in 1922, we paid \$526,246.07, with interest \$27,912.09, making \$554,158.16, and we paid that amount out of ordinary revenue.

MR. J. A. CURRIE: How much did the teachers pay?

MR. SMITH: The same amount.

MR. J. A. CURRIE: Is the teachers' amount included in the sum you gave?

MR. SMITH: No, that is a separate sum; we do not receive the teachers' money in the treasury office at all. It goes direct to the fund, but it is a fund by itself, and does not even come through my office. The grand total this Government has contributed to the Teachers' and Inspectors' Superannuation Fund is \$2,106,066.72, so that the total amount of the fund would be almost double that amount.

Another large legacy the present Government had to take responsibility for was loans under the Housing Act. In 1920 it cost \$4,236,708. In 1921 the Government gave notice

that they would withdraw from the loaning for Housing in the various municipalities, but they were committed to a certain liability with municipalities that had a guarantee of a certain amount of money, and therefore could not withdraw because they had started the groundwork, as it were, so in 1921 we paid \$1,589,223, and in 1922 \$428,387. This will complete the outlay of the Government on the Housing scheme.

Then we have another item by which the Government gained considerable, and probably saved the country from financial embarrassment; election expenses, \$608,960. Another thing that contributed largely to our uncontrollable expenditure was hospitals at Cobourg and Whitby, and the penal institution at Guelph, taken over during the war by the Federal Government. These institutions, I may say, also were in a badly neglected condition; all the institutions of the province were very much run down. No doubt the old administration felt they could not spend much money on them during the war, and it was up to the present administration to build up these institutions; and you have always got to remember this, that when you have a building or other things where there is depreciation you must make provision for keeping that building up, setting aside a certain amount each year for repairs. An estimated amount would be three per cent., and in our estimate we have kept them up with a little less than three per cent. on the original cost.

Legal Fees Compared

Another thing I want to bring to the attention of the House. My honourable friend from Grenville and the honourable member for Kingston have been going up and down the country telling people how much we spend on legal fees. The public would be led to believe that there had been no legal services engaged in this Province until the present administration took office.

HON. MR. FERGUSON: No, no, this Government was through with lawyers.

MR. SMITH: This Province is through, I believe, with some lawyers. (Laughter.) Up in London the honourable member for Grenville claimed it was the first gun in the campaign.

I imagine I hear him saying it at that Friday night banquet in London. He criticized the number of lawyers this Government has engaged. I do not say there is any injustice in him going out and telling the number of lawyers we have engaged, but I say people living in glass houses should not throw stones. In 1916-17, under the old regime, they paid for legal services, \$58,059.73 and employed 14 law firms.

Now I don't pretend to have any extra intelligence, but I claim to have good common sense. In 1917-18 the old Government paid \$57,078.66 and employed 20 law firms. In 1919, \$54,198.66 and employed 21 law firms. The present administration in 1919-20 paid for legal fees \$20,281.09 and employed 16 law firms, but \$7,350 was left over from the previous year, so the legal fees for which the Government was responsible amounted to \$12,931.09. Similarly, in 1921, \$114,496.45 was paid for employment of 27 firms, but of the amount some \$20,345.77 was left over by the late Government, so the legal fees in that year for which the Government was responsible were \$94,150. In 1922 the present regime paid out \$72,788 and employed 25 law firms. Compare the records: In three years the late administration paid out \$169,337.05, but were directly responsible for \$197,032.32, while in three years under the present administration the Government was responsible for \$179,870.38.

Results Justified Expenditure

But there is another side to this question. What was the result of the moneys paid out to these lawyers under the present Government? I think they were well worth while. The Government has already received from the employment of lawyers in the timber investigation alone, \$400,000, more than twice in cash what was paid out for lawyers. But we have, moreover, an outstanding asset (\$1,000,000 from the Shevlin-Clarke Co. alone) in the timber which is being cut as the result of the judgment of Mr. Justice Logie.

MR. J. A. CURRIE: Do I understand that is paid in, too?

MR. SMITH: Four hundred thousand is paid. I want to give you another example. In one year alone, when the succession duties did not amount to one-third of what they amount to the present year, they paid a law firm down-town

\$18,000 for investigating a case. In 1922, when the succession duties amounted to six and a half million, the amount paid for legal fees was only \$93.40, and that would not have been spent but for the fact that it was so far away that we could hire a lawyer in the district much cheaper than to send our own man up and pay his expenses.

MR. NICKLE: Do I understand \$72,000 was spent in 1921-22, and that covers fees paid Mr. Justice Sutherland, Mr. Gregory, Mr. Justice Latchford, Mr. Justice Riddell and expenses incurred by the Hydro-Electric Commission in their investigation?

MR. SMITH: I am not including judges by any means.

MR. NICKLE: You just mean legal fees. You don't count what was paid Justices Riddell and Latchford as legal fees?

MR. SMITH: They are not legal fees. Of course, if you take that into consideration, we pay judges' salaries throughout Ontario.

MR. NICKLE: You mean money paid to lawyers for legal fees, but not lawyers when they acted as commissioners?

MR. SMITH: Yes, legal fees.

MR. HILL: You spoke about the small amount of lawyers' fees in connection with the succession duties last year. How do you investigate these estates?

MR. SMITH: We investigate ourselves, with our own lawyers. The Solicitor under the Succession Duty Act is paid a salary and was under the old Government, but it was a wonderful field for patronage in the good old days. (Laughter.)

Financial Records Compared

I now wish to place before the House and the country at large the financial record of this Government for the fiscal year 1922 in comparison with the last year of the old administration; that is, to compare the expenditures and revenues of 1919 with those of 1922. This comparison reflects great credit upon the present Government, especially when it is considered that we have been in office during a very trying period,—the reconstruction period following the war, the

effect of which has been felt by governments as well as by individuals.

In our first year of office we had to make large borrowings for Hydro-Electric, Public Buildings, and Highways. Despite the high price of materials and high cost of labour this Government has gone ahead with what we believed to be in the interests of the Province at large. We have raised our revenues by taxation on the wealthy corporations, wealthy estates, amusements, luxuries, etc. There is no tax levied by this Government which is of a burdensome nature.

By way of comparison let me tell you of the old Government when they were in dire distress and wanted money in 1915. They did not increase the succession duties or tax the wealthy, but when the Honourable Mr. McGarry brought down his Budget Speech in 1915, he announced a war tax of one mill on the dollar. This was a tax on every acre of land in the Province and every home, and yielded about \$2,000,000 a year. I submit it was an injustice to the people of the Province of Ontario. No matter whether a man had a mortgage on his house or farm, he had to contribute his mill on the dollar. Contrast that, Mr. Speaker, with what I have already cited. We have taken our money from sources that have not affected the condition of the Province one iota. We have taken no taxes from the poor man, nor do we intend to.

Where the Money Came From

I wish to illustrate how revenues have been increased, new sources sought and results produced.

In 1919 the Ordinary Receipts were.....	\$19,900,000 00
In 1922 the Ordinary Receipts were.....	38,507,000 00

It will, therefore, be seen that the revenue was increased over eighteen and one-half million dollars.

I will tell the House where some of these increases came from:

	1919	1922	Increase
SUDSIDY.....	\$2,396,378 00	\$2,765,729 00	\$369,000 00
Due to increase in population.			
INTEREST.....	363,154 00	959,773 00	600,000 00
Due to special deposits, housing interest, etc.			

LANDS AND FORESTS.....	1,968,341 00	3,221,280 00	1,252,939 00
Due to increase of crown timber dues by Order-in-Council, April 8, 1920, and increase of prices of summer resort lands, by Order-in-Council May 29, 1922.			
EDUCATION.....	70,500 00	355,000 00	285,000 00
AGRICULTURE.....	219,700 00	312,000 00	93,000 00
GAME AND FISHERIES.....	703,938 20	762,345 00	58,406 80
Due to increased fees in establishing a system of royalties on pelts.			
PROVINCIAL SECRETARY'S DEPARTMENT.....	1,521,717 00	1,540,940 51
LAW ENFORCEMENT,			
O.T.A.....	1,732,042 14	1,732,042 00
MOTOR VEHICLES.....	1,580,000 00	3,477,000 00	1,897,000 00
Due to increase by legislation of motor fees and garage licenses.			
PUBLIC HIGHWAYS.....	346,000 00	346,000 00
INSURANCE.....	80,500 00	129,000 00	48,500 00
Due to increases in insurance agents' fees by amendment to the Act, and increase in registry fees of insurance companies by Order-in-Council.			
LAW STAMPS.....	142,800 00	318,400 00	175,600 00
SUCCESSION DUTIES.....	3,500,000 00	6,500,000 00	3,000,000 00
Due to a large extent to new rates imposed under Acts of the Legislature since 1920			
CORPORATION TAX.....	1,750,000 00	5,640,000 00	3,890,000 00
Due to 5 per cent. Tax on Wagers—Tax on Banks doubled—Race Tracks increased from \$1,250 to \$7,500 per day. Stock Transfer Tax raised from 2c to 3c per 100, etc.			
CASUAL REVENUE.....	1,450,000 00	2,100,000 00	650,000 00
Due to new Tax on Pool Rooms, \$70,000.00, Amusement Tax, etc.			
T. & N. O.....	600,000 00	600,000 00
HYDRO-ELECTRIC (Int.)...	2,036,000 00	5,866,900 00	3,830,900 00
LAND TRANSFER TAX....	520,000 00	520,000 00

Most of these increases are due to new legislation by present Government, and to better administration, and the

revenues have materially increased with the growth of the Province.

The Increased Expenditure

I have shown you how we have increased the revenues of our predecessors, and I will now make a comparison which will clearly show that this Government has spent the money in the interests of the people to a far greater extent than the late Government.

In 1919 the expenditure was \$21,000,000; in 1922, \$37,-000,000. There is, therefore, an increase of about \$16,000,000 to account for, and I propose to take a few minutes now and show just where the increases came in and where the money went.

Large Grants for Education

Take for instance, education. Four years ago we promised the people of Ontario that education would be liberally supported. We have kept our pledge—spending much more on this corner-stone of the structure of the Province's prosperity. The previous Government spent in 1919, \$3,300,000, while this administration in 1922 spent the magnificent sum of over \$7,600,000—an increase of \$4,300,000. This is a large increase, and we have got results. Our children are better served, better quartered and better satisfied. Our teachers are better paid, and our special technical schools well equipped, seventeen technical schools having been either completed, or almost completed, by this Government.

Now, I am well aware that there are among our critics those who are skeptical in educational matters, and educational equipment, and point to the old red school-house as typifying the peak of educational achievement in the way of buildings, and can cite distinguished men and women who have achieved education in the old school-house with its imperfect ventilation, etc., but would any of these critics be ready to go back to the old building? Not by any means. We have spent largely on education, but we have not been extravagant. Though inferior methods and equipment have never proven insurmountable obstacles to the select few, a higher level is fostered by a standard as thoroughly maintained as financial resources permit. We are willing to abide by the public conscience in the matter of education. The large amount of increase is accounted for by the number of rural

schools earning the larger grant, and creating efficiency in the school-room, from the standpoint of equipment and better qualified teachers. There has also been great expense for technical schools, of which the Dominion Government pays 50 per cent. of the cost of construction. We have no apologies to offer for our educational expenses.

More for the Public Service

Civil Government cost \$1,065,000 in 1919, and in 1922 \$1,800,000. The increase is accounted for by the fact that the Civil Service were given a reasonable increase in salary. Formerly all officials in the outside service were allowed certain perquisites, such as house, fuel and light. These have all been charged up to the individuals themselves as salary now. Previous to this time, these were left out of the reckoning absolutely.

Other factors that contributed to the increase in this service were new offices established, such as the Provincial Savings Offices, Agricultural Development Board, Mothers' Allowances Commission, Minimum Wage Board, etc.

More for Public Institutions and Agriculture

For Public Institutions, the increase in three years was \$950,000, caused mainly through the return of three institutions (Cobourg, Whitby and Guelph), after temporary use by the Federal Government for war purposes. There was also a large increase in Hospitals and Charities. It is, therefore, seen that this Government spent \$1,400,000 more for the invalid wards of the Government in 1922 than the old Government did in 1919.

There was also a large increase in the amount spent for Agriculture, mainly brought about by work of the "short course," inaugurated by the present Minister, which is becoming quite popular. This is a school instituted in the counties,—I think last year. We also instituted an experimental farm down in South-West Ontario. About \$50,000 has been invested in lands and buildings, but the cost and maintenance will be returned manyfold to the people of that district, by the benefit they will derive by testing out of various crops.

Another outstanding increase in the Labour and Health

Department, due to health expansion in instituting clinics of various kinds throughout the Province for the convenience of the public. Then, of course, there is the Mothers' Allowances of \$1,379,000.

Summary of Increased Expenditure

In round figures there is \$16,000,000 of an increase for 1922 over 1919 to account for. If we take off the interest, we have \$11,000,000 left. Deduct the Education increases and we are down to \$6,500,000. Take off the increases in Labour and Health, which includes the Mothers' Allowances, and we have \$4,600,000 left. Now we have the Public Institutions increases. If we deduct them we still have \$3,600,000. Take off Statutory Expenditure—\$2,600,000—and we have \$1,000,000 left. Deduct the Agricultural increases, and we are down to \$610,000. The Hospitals and Charities increase was \$400,000. Deducting this brings us down to only \$210,000, and this is divided up in Legislation, Colonization Roads and Treasury Department.

This accounts briefly for our increased expenditure, details of which are in the Public Accounts and open for the inspection of anyone.

Larger Grants for the People

Now, Mr. Speaker, I have in my hands a most interesting document entitled, "Ontario's Successful Financing—Revenues Applied for Enlarged Public Services."

I imagine this document was edited by the member for Grenville. It is in a condition similar to the old party,—somewhat dilapidated.

This little pamphlet was, I believe, used very extensively in the last election, and in view of what has been said throughout the Province, I think it is appropriate that I read a portion of it to the House. The old Government took great credit for increasing the revenue. They gloried in it and advertised the fact. The pamphlet says, "Ontario's finances are so well managed that there is no controversy in regard to them." They had increased the revenue from \$4,400,000 in 1904 to \$19,200,000 in 1918. Our revenue to-day, Mr. Speaker, is \$38,000,000, over twice the amount of the sum claimed in this document. They took great credit for increasing the taxes on race-tracks from \$500 per day to \$1,250. Mr.

Speaker, we have increased them to \$7,500 per day, and in addition have raised over \$2,000,000 from the 5 per cent. tax on wagers.

Under the heading of "Larger Grants for the People," the pamphlet states that \$3,807,000 was spent for education in 1919, and proceeds to say that the 1919 outlay for education is more than double that of 1910. Why, Mr. Speaker, this Government has spent over \$9,000,000 in 1922 for education,—three times that of 1919 and five times that of 1910.

I could give similar comparisons all through this little pamphlet, but my time is limited.

Suggestions for Retrenchment Invited

Every dollar spent by this Government has been in the interest of the Province of Ontario, and just in passing, let me read you what the Honourable Mr. McGarry said in his Budget Speech delivered on the 23rd day of February, 1915:—

"Returning to the question of assets and liabilities, "I will ask my honourable friends what they expect to "gain by making the attack upon the Government with "respect to the state of our finances to-day. We have "given to the House, and we are giving to the country, "the statement of the assets and liabilities, giving a "statement of the revenue and expenditure. We are "able to show, and we are not ashamed to show, that if "during the past ten years we have largely increased "the expenditure of this Province, we have collected the "money with which to do it. But we have taken on "increased obligations, and we have provided the means "to do it. We have shown, and we are continuing to "show, that every dollar of expenditure by this Govern- "ment has been in the interest of the Province of Ontario. "I ask honourable gentlemen if it is their intention to "have us reduce our grants to education? If they are "going to reduce, let them stand up and say so. I ask "my honourable friends if it is their intention to reduce "the grants for the maintenance of Public Institutions, "or the Hospitals and Charities? I ask my honourable "friends if it is their intention to reduce the grants to "Northern Ontario roads, if it is their intention to curtail "the amount spent upon agriculture? I ask them, in

"heaven's name, if they are going to traduce the good "name of this Province, and if they wish to establish "before the world that we are going to the dogs and are "in the face of ruination? I ask them, I repeat, to "point to one way in which we can save the money. "Will honourable gentlemen stand up and name one "item in which they desire us to make a reduction?"

MR. SPEAKER, the same thing applies to-day. The honourable member for N.E. Toronto, the Conservative Whip (Mr. Thompson), in speaking on the Address from the Throne, said we should take more care of the feeble-minded, and that we should provide for old-age pensions—just going to show that increased expenditure is suggested by the Opposition and not retrenchment. Last year, my honourable friend from Kingston, in making his speech on the budget, advised more money for higher education. No particular retrenchment has been suggested, but expansion in every direction is always the cry.

The Provincial Debt

The direct liabilities in 1919 were \$97,572,000, and on October 31st, 1922, \$240,900,000—an increase of \$143,000,000, and I propose to tell the House just what composes this \$143,000,000 increase. It is astonishing how the honourable member from Grenville varies in his figures about Ontario's debt. According to the press reports, he said in North Toronto recently, that our debt would be about \$260,000,000. At Ward 5 Conservative meeting, he said the debt in 1919 was \$97,000,000, which was correct. At another meeting, it is reported that he said the debt when the Conservatives left office was \$90,000,000 and now \$250,000,000. On November 25th, 1922, at the Conservative Club in Toronto, he said the debt was \$92,000,000 when they left office. On May 19, 1922, he said it was \$94,000,000—a million or two is neither here nor there between friends. (Laughter and applause.)

Where the Money Went

We have an increase in the three years in direct liabilities of \$143,000,000. Advances to the Hydro in the three years accounts for \$71,448,000 of it, yet we have been accused of being opposed to Hydro. Let me say in passing, that during the darkest hours of financing I hope this Province will ever face, we were paying one million dollars a week towards development of Hydro-Electric Power in this Province. Then in the three years we spent in round figures the following amounts:—

Hydro Electric-Power Commission.....	\$71,400,000 00
T. & N. O. Railway.....	3,300,000 00
Highways.....	36,900,000 00
Northern Ontario Development.....	3,700,000 00
Public Buildings.....	3,800,000 00
Colonization Roads.....	1,000,000 00
Lands and Forests:	
Forest Ranging, Fire Ranging, Surveys, Reforestation, Clearing Townsites, etc.....	1,400,000 00
Capital Expenditure on Public Works.....	800,000 00
Purchase of Bonds and Stock (Succession Duty Free) for sinking fund purposes.....	6,670,000 00
Housing Loans to Municipalities.....	6,250,000 00

I have accounted for \$135,000,000 and the remaining \$8,000,000 is represented by cash in the bank.

The T. & N. O. Railway a Valuable Asset

On 31st of October last, our gross debenture debt was \$221,836,338.56. This includes certain interest bearing and sinking fund debts. We have the Hydro Electric Commission advances of \$117,964,934.63. We have the T. & N. O. advances of \$25,653,675.02. I claim these are self-sustaining debts, as they are amounts invested in revenue producing enterprises. As the *Toronto Globe* in its editorial of February 22nd puts it, and I think very fairly, "no one would dream of regarding the T. & N. O. Railway as merely an addition to the Provincial debt." Although we have not the revenue in dollars and cents, we have received it in other ways, and the railway will eventually be a valuable asset for the Province. Although it shows a loss in interest charges at the present time, we are taking out of the earnings a sufficient amount to keep up the road, and to take care of it so the railway is always 100 per cent. or thereabout efficient.

Sinking Fund to Retire Debt Established

In addition to the revenue producing enterprises I have already mentioned, composed of the Hydro and T. & N. O. Railway, we have debts for Housing, \$7,355,717, and Drainage purposes, \$1,350,767, which are a direct liability upon the various municipalities, or, in other words, we have a total interest-bearing debt of \$152,325,994. Then we have the general sinking funds of the Province of \$7,921,883. Deducting these amounts, our net debt as of 31st October, 1922, is \$61,589,359, and, Mr. Speaker, I am at this time going to make provision to retire this debt of the Province of Ontario. (Applause.)

Expenditures Reduced to Meet Sinking Fund

I propose during the next few weeks of the Session to introduce an amendment to the Provincial Loans Act providing for the establishment of a sinking fund of half of one per cent. every six months, of the full amount of this debt. As of 31st of October, 1922, this would amount to \$615,893 annually, or \$307,000 every six months. I propose, Mr. Speaker, to pay this out of Ordinary Revenue and our expenditure will be reduced to allow of this being done and to pay for further interest charges. (Applause.) Therefore, commencing on the 30th of April next, I intend to go into the money market and, unless I change my mind, I will not buy anything but Ontario Government or Victory bonds for this sinking fund. These bonds will be put in the vault of the Treasury Department, and at the end of each six months we will take the coupons off and add the interest and go out and buy more bonds with the coupons, add interest on interest, and every six months continue this procedure. Within a forty-year period based on a four per cent. basis, our total indebtedness will be retired. (Applause.)

The Hydro-Electric will go on, but that is a municipal indebtedness which the municipalities will pay to us without any doubt.

Basis of Four Per Cent. for Sinking Fund

The debt could be retired earlier, but on a four per cent. basis, it just about retires the whole debenture debt at that date, but we will at the present time get a much larger

interest rate on the bonds we buy, for nobody can foretell what the interest rate will be in the future. It probably might take five years off our term and retire the debt at the end of thirty-five years. Hereafter that one per cent. per annum, or half of one per cent. every six months will apply to all these loans in the Province of Ontario for which a sinking fund is not provided.

MR. J. A. CURRIE: One per cent. per annum would wipe it out in twenty to twenty-five years. The Minister must be mistaken.

MR. SMITH: I don't think I am as likely to be mistaken as my honourable friend, because we have it worked out carefully by mathematicians.

You have to remember this: there has got to be a certain interest rate, and it altogether depends on the rate, and you cannot get up and say one-half per cent. will pay off a certain amount at a certain time, because you do not know what the interest rate will be.

MR. J. A. CURRIE: The honourable Minister knows now the interest rate on these bonds.

MR. SMITH: Supposing I go out and buy a 1933 Victory Bond. At 1933 it falls due, and say it is \$1,000, and I get it from the Dominion Government. Probably at the time that bond expires, 1933, the interest rate has gone down to $3\frac{1}{2}$ per cent. I invest that thousand at $3\frac{1}{2}$ per cent. Now, does any man stand up here and tell me he knows what the interest will be or what he is going to buy?

MR. J. A. CURRIE: He is putting aside every year his interest, and does not have to figure what his bonds are in the future. Besides, he can buy every year his own bonds into that sinking fund, as done by all the States and Provinces.

MR. HAY: The Provincial Treasurer is basing his calculation on four per cent.

Assets Exceed Liabilities

I now come to the Assets and Liabilities of the Province. The details of these are given in the Public Accounts. We have an increase in assets over last year of \$41,000,000, and

an increase in direct liabilities of \$35,000,000. Our direct liabilities are now \$240,000,000, but our assets are nearly \$14,000,000 over that amount. Honourable members will find details of this also in the statements on their desks.

Credit of Province Stands High

I now come to the subject of the credit of the Province and of the loans floated during the past fiscal year.

As the Public Accounts show in statement No. 1, we borrowed some \$84,000,000.

It will be a matter of satisfaction to the members to know that all our bond offerings met with a most favourable reception in the money markets.

We sold long term bonds to the amount of \$50,000,000 and I will give the House some details of this.

In January we floated a \$15,000,000 15-year, 5½ per cent. loan, series "ZZ". It was sold to the highest bidder, which was a syndicate composed of twenty-four bond houses, at a price of 101.4537, a cost basis of 5.35 to the Province. The *Globe* in commenting on this loan said, on January 5th:

Despite the low premium on New York funds, it was considered that the Province of Ontario made a good sale of its \$15,000,000 bond issue yesterday. The sale of Ontario 5½ per cent. bonds above par, shows a remarkable change in the money market and is proof that the credit of the Province is unimpaired by heavy borrowings.

Best Price for Loan since the War

In April I sold our second long term issue. It was also for \$15,000,000, 30 year term, five per cent, series "AB," and on calling for tenders, I received the remarkable price of 97.409 U.S. funds, from a syndicate composed of thirty-five bond houses, a cost basis of 5.16 per cent. and adding the premium on New York funds a cost basis of 5.01 per cent.

In view of what my critics have said, may I be pardoned, Mr. Speaker, if I say that I am proud of this piece of financing. It established a new mark and was the highest return received by any Province, or the Dominion, for bonds up to that date since the war. I do not think it wise to make comparisons, but I do say it reflects favourably on the financial administration of this Province that we were able to obtain so excellent a price.

The *Globe* in its issue of April 12th, in commenting on this sale, said:

The price was almost par and the cost basis slightly higher than five per cent. In view of the fact that former issues of Provincial bonds have sold substantially lower and the Province of Alberta issue offered in New York a few days ago was disposed of on the 5.30 basis, the price can be regarded as highly satisfactory.

The *Star*, commenting on this issue on April 11th, said:

New landmarks were raised in the market for Canadian Provincial bonds to-day, when the Province of Ontario, opening tenders at noon for its \$15,000,000 offering, accepted the bid of the National City Company of New York and Toronto, which was 97.409. Without taking account of the exchange premium, which the Province receives on the issue, the cost basis works out at about 5.18 per cent. New York funds. Adding in the exchange premium, the cost basis calculated in Canadian funds is approximately 5.01 per cent., the lowest price yet received on any Provincial issue.

The *Mail* on April 12th said:

The highest return on any Provincial issue since before the war, was received by the Honourable Peter Smith yesterday, when a \$15,000,000 issue of five per cent. bonds was sold to a syndicate of Toronto and New York bankers. Seven bids were put in by syndicates, an evidence of the excellent market for Ontario bonds.

The *Financial Times*, April 13th, said:

The price was almost par and the cost basis slightly higher than five per cent., etc. The price can be regarded as highly satisfactory.

Excellent Financing in U. S. Market

In September I advertised for tenders for \$10,000,000 loan, but on account of the Turkish situation, which was then very acute, I withdrew my advertisement until October, when I advertised and sold a \$20,000,000 issue, 20-year term, five per cent. series "AC," to the highest bidder (we always sell to the highest bidder), composed this time of a syndicate of no less than forty-one bond houses. The price was 97.67 U.S. funds, a cost basis of 5.18, or, deducting discount on U.S. funds, 5.20.

At a risk of wearying the House, I will read comments of the financial experts in the press on this issue:

Monetary Times, October 13th.

The feature of the bond market during the week was the sale of the twenty million Ontario issue for which tenders were called up to Tuesday.

That Ontario and other Canadian bonds are held in high esteem by United States investors can be judged from the number of tenders received,

totalling seven, representing forty-five prominent bond houses on both sides of the line, and also the price paid by the successful syndicate. Considering the condition of the market during the past few weeks the flotation was a success, as the cost to the Province was only 5.19 per cent., whereas the opinion of several of the bond dealers was that the Province would have to pay from 5.25 to probably 5.40 per cent., for its money.

Globe, October 11th.

A Province of Ontario issue of bonds amounting to \$20,000,000 was awarded yesterday to a syndicate headed by Kuhn, Loeb & Co., and including the Chase Securities Corp., Kidder, Peabody & Co., Hallgarten & Co., Wood, Gundy & Co., and United Financial Corp. The bonds mature in 20 years, bear interest at five per cent., and the Province received a price of 97.67 and interest, equivalent to a cost basis of 5.19 per cent. The entire issue will be offered in the New York market.

This is the largest piece of Canadian Government financing that has ever been carried across the border, with the exception of Federal Government loans. The offering commanded widespread attention among Canadian and American bond dealers, no fewer than seven tenders, representing forty-five firms, being submitted. The price paid by the syndicate is considered attractive, particularly in view of the size of the issue, and in the exceptional number of tenders received there is an indication of the favour with which Ontario bonds are regarded by investors on both sides of the line. This offering completes the Provincial Treasurer's long date financing for some little time.

Mail, October 11th.

The price paid by the syndicate was 97.67, at which price the money is costing the Province 5.19 per cent. This is considered to be a satisfactory price, and may be considered as evidence of Ontario's high standing in the United States market.

Financial Times, October 14th.

In commenting on the sale of the above loan said: "This is the largest single financing ever carried out by a Canadian Provincial Government in the United States and the offering commanded wide attention among Canadian and American bond dealers, seven tenders representing forty-five firms being submitted. The price paid by the syndicate is considered attractive particularly in view of the size of the issue, and in the exceptional number of tenders received there is an indication of the favour with which Ontario's bonds are regarded by investors on both sides of the line."

Is it not, Mr. Speaker, a most striking fact that the criticisms we have received did not come from financial men, from financial newspapers or the financial editors of daily papers, but from inexperienced partisans? I have many letters from disinterested persons, from men of all political parties, congratulating the Province on these bond sales, and I seriously say that in my opinion the credit of this wonderful Province, so rich in natural resources, prosperous and progressive, was never higher in the history of the money markets than it is to-day. (Applause.)

“Ontario’s Credit Stands the Highest”

Let me read one more opinion, an unbiased, unsolicited opinion on my last bond issue of the year. This was made by no less a gentleman than Sir William Wiseman, a financier of international fame. He said, according to the *Toronto Globe*, in referring to the Province of Ontario bond issue: “We floated that \$20,000,000 loan for the Province of Ontario the other day in New York. There was no difficulty, for of all the financial propositions and of all the Canadian Provinces, Ontario’s credit stands the highest.” (Applause.)

Mr. Speaker, need I say more? My critics have frantically shouted all over the country of alleged extravagance,—the country was going financially to the dogs! But, Mr. Speaker, the financial barometer, which, by the way, is a very sensitive instrument, did not register anything beyond a slight disturbance. These extravagant utterings were not taken seriously by the people, or in the money markets, and to-day we stand as we should with unimpaired credit and with the Province of Ontario bonds forming a substantial part of the deposit boxes of the people. (Applause.)

Now, Mr. Speaker, this is an account of my financial borrowings in long termed bonds (the balance borrowed was in Treasury Bills, from the Ontario Savings Offices, etc., see statement No. 1). I am not ashamed of this record.

Application of Borrowings

What did we do with the \$84,000,000 borrowed? I think the House ought to know. The whole of these borrowings were paid into the Consolidated Revenue Fund and applied on Capital Account as follows:—

Refunding of Loans and Treasury Bills.....	\$40,010,000 00
Loans made under the Agricultural Finance Act. (See statement No. 1 for detail).....	2,711,000 00
Hydro-Electric Commission advances.....	14,134,000 00
T. & N. O. Ry. advances.....	2,054,000 00
Purchase of Succession Duty Free Bonds and Stock	5,609,000 00
Retirement of Inscribed Stock in London.....	2,948,000 00
Highways Construction.....	17,188,000 00

Tenders Opened Publicly

Our system of selling loans is different from the old Government. Of course, you should expect people to advance and get more up-to-date as time goes on. I never see the tender for the bonds until the day and hour the tenders are to be opened. All the bond brokers who wish to come up with their tenders are invited into my office. The tenders are laid on my desk and I read them out to the whole bunch. I don't sell any private loans and do not open any tenders in private. (Applause.)

Absolutely Sound Financially

I think I have shown the House the Province is absolutely sound financially. The statement and the way our bonds have been received is sufficient evidence. If we had done things that were alleged, there would have been good ground for criticism by honourable members opposite. I feel it is my duty probably as treasurer to bring this to the attention of the people and this House at this time. As I said earlier in my address, everybody has gone wild spending money, from individuals to Governments (hear, hear!), and notwithstanding that, we have tried here to reduce our expenditure, and we are determined to do so as you will see by the Estimates. Yet we have people coming to us saying, "you are spending too much there,—but give us so much over here." It has been the same with municipal and county councils, but fortunately the rural councils are in a sound financial position, —very few have any debt worth mentioning. The urban municipalities have a different story to tell. I have a statement of fifty-one such, and I am going to mention a few as to their per capita debt. This statement does not include the debt for which sinking fund is provided, but debt which must come out of tax rate.

MR. NICKLE: Excluding public utilities and all that?

MR. SMITH: Utilities deducted, and I give you the total debt and public utility debt.

Per Capita Debt of Municipalities

	Total per Capita	Public Utility Debt	General Debt
Brantford.....	\$127.85	\$55.08	\$72.77
Fort William.....	269.01	109.30	159.71
Galt.....	145.48	42.41	103.00
Hamilton.....	116.00	31.00	84.00
Kitchener.....	105.00	37.00	68.00
London.....	170.00	65.00	105.00
Oshawa.....	120.00	37.00	83.00
Ottawa.....	137.00	38.00	98.98
Peterborough.....	130.00	44.00	86.00
Port Arthur.....	392.94	156.00	235.97

up to 31st December, 1921. This gives you an idea of cities and towns in the Province. There are only nine out of fifty-one under \$100 debt per capita. Toronto has \$195.25 total per capita; \$96.58 public utility and \$98.67 general debt per capita.

These things have great significance in the welfare of the community. Some municipalities are so badly in debt they will have difficulty in financing themselves in a short time, and I think it is time people realize the war is over and get back to normal. (Applause.)

Per Capita Debt of the Provinces

Now I have here a statement of the different provinces in the Dominion. They are in a much more fortunate position than the urban municipalities. Quebec is the lowest. Their liabilities are \$62,115,000; their revenue-producing debt \$11,831,000, and general debt for which no provision is made except to take out of ordinary revenue, \$50,283,770, or a per capita debt of \$21.30. They stand first, Ontario is next. The direct liabilities, as I have already told you, are \$240,000,000; revenue-producing debts, \$152,000,000, leaving \$64,000,000 after deducting sinking funds, etc., of a non-revenue-producing debt, or a per capita debt of \$22.00. Nova Scotia is third, with a per capita debt of \$27.53; Saskatchewan, \$33.69; Manitoba, \$44.03; New Brunswick, \$44.65; Alberta, \$59.77; British Columbia, \$71.60. I have no hesitation in saying the Province of Ontario with her \$22 per head debt and great resources will have the least difficulty of any in meeting her obligations. (Applause.)

No New Taxation Contemplated

This province must go on in its forward movement, and nothing my honourable friends can say will stop it. (Applause.) I am fully decided at this time not to go into the field of taxation any farther. (Applause.) We have no income tax in the province, nor direct per capita tax, and as long as I am Provincial Treasurer there never will be.

MR. NICKLE: The only taxes you can levy are direct taxes.

MR. SMITH: That is perfectly true, but I mean direct, individual tax on everybody in the Province.

They have direct individual tax in every province of the Dominion west of us. In British Columbia they have an income tax, and a poll tax of 60 cents a head to live there. They have an income tax in Manitoba going through the House at the present time. They have a land tax in all the western provinces, two mills on the dollar for all unoccupied land. We have nothing of that description, nor do we intend to. We have plenty of revenue to take care of all our expenditures and take care of them well. I am not especially interested myself as to whether there will be a big surplus next year as long as we pull out even. I don't think we have any right to try and pile up big surpluses because we are getting the money from the people, and any benefits derived should go back to them.

MR. MARSHALL: I presume the Minister is expecting as much income or possibly more from the race-tracks as last year?

MR. SMITH: Approximately.

Millions Returned to Municipalities

As I have already said, we do not tax the poor man, and I have here a statement of monies which you might say are returned to the ratepayers and from which the municipalities receive a direct benefit, thereby relieving local taxation. These facts are none too well known throughout the country. The House will be interested to know that this statement of amounts expended in the past fiscal year, which are of a character from which the municipalities received direct benefit, totals no less a sum than \$23,800,000, made up as follows:—

Administration of Justice:		
Counties and Districts.....		\$521,746 00
Education:		
Grants to Schools		
Public, Separate and High Schools and Collegiate Institutes.....	3,702,346 00	
Normal and Model Schools.....	481,500 00	
Technical Education (proportion paid by Province).....	542,000 00	
Grants to Universities.....	2,053,237 00	
Schools for Deaf and Dumb and Blind, and Northern Academy, Monteith.....	263,648 00	
Public Institutions:		
Ontario Hospitals for the Insane.....	3,575,600 00	
Agriculture:		
Community Halls.....	29,511 00	
Grants for Agricultural Purposes.....	278,062 00	
Agricultural Representatives.....	166,997 00	
O. A. College and Farm.....	581,321 00	
Colonization and Immigration.....	111,961 00	
Hospitals, Refuges and Orphanages.....	1,300,718 00	
Labour and Health Department:		
Employment Bureaus.....	160,694 00	
Mothers' Allowance (proportion paid by Province).....	822,431 00	
Public Health Laboratories.....	34,507 00	
Maternal and Child Welfare.....	67,654 00	
Preventable Diseases.....	74,729 00	
Free vaccine	59,487 00	
Lands and Forests, including roads in Northern Ontario.....	1,408,613 00	
Colonization Roads.....	671,184 00	
Provincial Secretary:		
Purchase of coal for re-sale to municipalities.....	35,546 00	
Northern Ontario Relief.....	10,568 00	
Unemployment Relief.....	335,758 00	
Public Highways:		
County Roads.....	3,024,660 00	
Township Road Grants.....	701,350 00	
Grants to Municipalities linking up Provincial highways.....	167,615 00	
Maintenance of Provincial highways.....	903,732 00	
Public Works:		
Proportion of cost of works re Unemployment.....	140,000 00	
Drainage Aid Grants.....	65,600 00	
Bridges, etc.....	385,000 00	
New Buildings:—		
Ontario Hospital, Whitby.....	355,310 00	
Ontario Deaf and Dumb Institute.....	244,548 00	
Northern Academy, Monteith.....	35,307 00	
New Veterinary College.....	158,113 00	
New Dairy Building, O.A.C.....	127,605 00	
Stables, Veterinary College.....	14,570 00	
Eastern Dairy School.....	24,807 00	
Students' Residence, Kemptville.....	22,821 00	
New Court House, S. S. Marie.....	164,371 00	
Addition to Court House, Parry Sound.....	47,345 00	
		\$23,872,572 00

Estimates for Next Year

From the statements on the members' desks it will be noticed that:—

The estimated receipts for the fiscal year, ending October 31st, 1923, are.....	\$39,372,029 08
The estimated expenditure, part of which was voted in the Supply Bill last Session, and the balance of which will be included in the Supply Bill of the present session, is	25,598,208 82
Capital expenditure, estimated.....	26,682,001 09
Total.....	\$52,280,209 91

As the members are aware, this does not include Statutory Expenditure.

Future Borrowings

This year I expect to go into the money markets for approximately \$35,000,000 and I will shortly be bringing down the usual Provincial Loans Act giving authority to borrow this amount. The Minister of Highways being away, I do not know definitely what his total will be, but his Department has given me an estimate of \$16,000,000. We have Treasury Bills and Loans to refund during the coming year of \$11,000,000. T. & N. O. Ry., \$3,000,000, and about \$5,000,000 may be required for purchase of Succession Duty free bonds.

MR. NICKLE: Where did you get the \$10,000,000 you show in Highway Improvement Fund as receipts?

MR. SMITH: Out of the Treasury Department. They made a requisition and we transferred it out of the Consolidated Revenue Fund.

MR. NICKLE: Charged to Capital?

MR. SMITH: Yes.

MR. NICKLE: Why was it the Government changed its policy and did not take advantage of the legislation the House passed last year as to the \$2,000,000 capitalization of motor tax?

MR. SMITH: The season was pretty late and the money markets not very good, and we decided to let it stand over.

Municipalities Saved from Tremendous Obligation

To the criticism of the kind I mentioned earlier, I pay no attention whatever. (Applause.) We have carried on an administration in an impersonal and impartial manner and the country has profited and developed generally by our administration. It is a well known fact that had the last election returned the old Government to power, we would have been launched into one of the largest schemes of radial railroads ever heard of in the history of the Province. It is also well known and generally admitted by all who know anything of the circumstances that all the Chairman of the Hydro-Electric Power Commission had to do with the late Government was to come up with his proposition, hand them the pen, and say 'sign here.' If the late Government had been returned to power, we would have had a radial railway scheme that would have put the municipalities into such a tremendous debt that they would never get out.

Courageous Attitude of Prime Minister

The Province of Ontario to-day owes a lasting debt of gratitude to the present Prime Minister for the courageous stand he took in the radial railway question alone. (Applause.) Heretofore, under the old regime, there was never a negative side to any question relating to Hydro development or Hydro Railways. Now Hydro development has been a wonderful boon to the Province of Ontario, yet a great many people were doubtful about the radial scheme, but, Mr. Speaker, no one had the courage to say "You have got to show me," until the present Premier of this Province did so. (Applause.) And the state of mind of the interested municipalities was exemplified very decisively in the January elections. Let me say further, the Honourable Mr. Drury showed the sort of stuff he was made of, when immediately he heard of the conflagration in Haileybury, he jumped on the train, and rushed to the scene of disaster to see what steps could be taken for prompt relief. (Applause.) Any man who exemplifies a spirit of decisive action of this kind is courageous and honest, and the sort of man we require as First Minister in the Province of Ontario. (Applause.)

An Impregnable Budget

In conclusion, let me say I have given to the House an account of my stewardship. I believe this stewardship has been justified by the results obtained, and that we have given the people of Ontario the greatest possible return for the capital invested.

The Budget itself is impregnable, but I would like to have the usual opportunity of adding a few words before the close of the debate.

No one can truthfully say that we have shirked our responsibilities. If the verdict of the people at the next election elevates the honourable member for Grenville or the honourable member for North Perth into the premier position of the Province, this Government will be quite content to abide by that verdict, confident in the knowledge that they have done their duty by the Province, and that the Province has benefited by this administration. (Loud and prolonged applause.)
